

# Slackware ARM on the Hummingboard

There are many ARM devices on the market at the moment, with even more appearing regularly, and it's not possible to provide support for them all in the main Slackware tree.

The Hummingboard, by [Solidrun](#), is supported outside of the official Slackware tree by the Slackware community.

The [Cubox-i](#) is totally compatible with the Hummingboard and can install and run the same Slackware ARM software.

## Slackware 14.1, 14.2

The link below is maintained by a separate author as a part of the Slackware community effort.

Site	Slackware versions	Using official Slackware packages	Installation methods	Notes
<a href="#">fatdog</a>	14.1, 14.2	Yes	Slackware installer	An end-to-end HOW TO guiding you through the installation and setup process.
