I translated the english version to french, and corrected some bulletting in the french version first.
As I corrected the english file AFTER, the french file is marked as "outdated", even if I edited it.
Err, in fact I wrote nothing, I just pressed Edit and added a modifying comment. Of course, the file is still tagged as outdated.
How to fix this ? I just add a space or a bunch of random letters somewhere, then deletes it/them ?

Thanks
