

This pages has two issues:

- No Source is indicated and the author is unknown.
- The heading in the page is “hosts.allow, hosts.deny” but the page's name is “inetd”.

Thus it's hard to understand the real purpose of this page; is it a presentation of the super-server, or just an how-to deal with its security concerns? — [Didier Spaier](#) 2015/06/25 12:12
