

The resume offset computed by the command in the article is incorrect for me and does not work.

```
sudo /sbin/filefrag -v /swapfile | head -n -3 | tail -n 1 | awk ' {print $3
}'
# ^ This is incorrect
```

The correct offset is found in the following article:

[https://wiki.archlinux.org/index.php/Power\\_management/Suspend\\_and\\_hibernate#Hibernation\\_into\\_swap\\_file](https://wiki.archlinux.org/index.php/Power_management/Suspend_and_hibernate#Hibernation_into_swap_file)
