I would like to request for you to add a description of what the program does and a link to the original website so more information can be gathered. You should also change the installation step to state to install it through sbopkg or the slackbuild — *Matthew Fillpot 2012/12/19 17:56*

Are you referring to the ntop service at http://www.ntop.org/products/ntop/ within this article? — *Matthew Fillpot 2012/12/24 21:19*

It would be nice to direct the reader the README.SLACKWARE file that comes with the slackbuild. It shows how to automate the update of the ntop tables after installation through cron jobs. — *escaflown 2012/12/26 20:28*
