

I found the following note

There is a typo in the path of the article. It should be start » talk » slackbook » filesystem_hierarchy. escaflown 2012/09/01 11:52

in the deleted filesystem_heirarchy talk page, do you think that we should place all slackbook pages under the start page or leave them be as the heirarchy link on the top already points to the start page? — *Matthew Fillpot* 2012/09/03 10:59

Eric H might be able to help with this.2012/09/03 13:41

I received word from Eric H on the IRC channel:

»> **alienBOB** - slackbook:Start namespace? No way. They should be in slackbook:

The “:start” page is where you land if you just type <http://docs.slackware.com/slackbook>:

On that note I will continue to place the slackbook pages in the base namespace.
