

# Pages that require attention from an editor

If you find a page on the Wiki which requires attention from a site admin, or an editor/reviewer, you can add a tag “needs\_attention” to the bottom of the page.

Depending on whether a tag already exists, you either create the tag or expand it, and add a comment with an explanation for your flag (which will be invisible in the Wiki page). Two examples of that:

```
<!-- This page is empty - someone created a translated page and forgot to
also add an english version -->
{{tag>foo bar needs_attention}}
```

```
<!-- This page is written in very bad english, it needs an editor to proof-
read and fix this -->
{{tag>needs_attention}}
```

By doing that and saving your change, that particular page will automatically show up here! The admin team will do regular checks on this page.

## List of tagged Pages

Page	Date	Description
• <a href="#">Install nfdump/nfsen on Slackware</a>	2012/12/22 03:34 (UTC)	Install nfdump/nfsen on Slackware Concepts you should know: A device is setup to constantly send out netflow information, it is not polled. A receiver listen...
