CSS Style:

The CSS style of **Persian (fa)** wiki page is really panic! How can I Edit them?
— *Shahin Azad* *2012/10/22 06:44*

> Hi Shahin, I think it is just the text inside the <box> </box> section which is not rendering correctly? In that case, just leave the box statement out. All it does is add a little background colour to that section, and it is not really required.
> You should perhaps leave a comment about this CSS issue in the discussion section of
> https://www.dokuwiki.org/plugin:box . It would be nice if the developer of the plugin can fix this. I can not…
> — *Eric Hameleers* *2012/10/22 08:05*

>> Hi Eric, Actually I'm not sure where is the problem from. But I manipulated some section of this CSS and I think it's fine enough! This sections are: th, td{} - div.dokuwiki ui{}, #p-cactions{}, #content and div#column-one…! could you please check and say where this sections are related to?
>> — *Shahin Azad* *2012/10/22 13:37*

>>> Hi Shanin. If you can post the full relevant CSS here on this page I can import them into the Wiki template's "rtl.css" file which is specifically meant to tweak Right-To-Left language rendering. And by the way: thanks for working on the Farsi text! I am really excited by having non-Western languages featured in this Wiki.

>>>> It's my pleasure to help this awesome community. Thank you for giving this opportunity to us.
>>>> Here is the style:

```
th, td {
    text-align: justify;
}
div.dokuwiki ul {
    margin: 0.3em 1.5em 1em 1em;
}
#p-cactions {
    left: 18.5em;
}
#content {
    margin: 2.8em 0 0 13.2em;
}
[dir="rtl"] .dokuwiki a.urlextern, [dir="rtl"] .dokuwiki a.windows,
[dir="rtl"] .dokuwiki a.mail,   [dir="rtl"] .dokuwiki a.interwiki,
[dir="rtl"] .dokuwiki a.mediafile {
    padding: 0 0 0 18px;
}
div#column-one .portlet .pBody ul {
    margin: 0.3em 1.5em 0 0;
```

```
}
```

There is just one problem about top navigation menu. It related to the #p-cactions. the left: 11.5em has to be removed but I don't know how to do it when I'm overwriting CSS. for now I just increased it's value and it looks like fine in my display, but I'm not sure about larger ones!

Is there any hope? — *Shahin Azad* *2012/11/15 07:30*
