Thanks for this article! I reformatted the page so that it is more in accordance with our style guide. Please take a look at the Wiki markup I used to make the page easier to read.
Also, could you perhaps add some background to this HOWTO (and the others which you wrote)? Such as,

- what is this software for?
- does it interact/conflict with other software which I can install
- does it add or replace functionality of Slackware?
- why do you configure it the way you describe?
- are there security concerns with regard to unauthorized access to the data?
- etc…
