

Two remarks:

1. I think that “`noryungi@mypc$ scp TEST.rsa.pub nr@test.example.com:/home/nr/.ssh/authorized_keys`” is a potentially destructive command. What if the user already has a `~/ .ssh/authorized_keys` file? You need to elaborate.
2. Remove the “template” tag from the page. What did the comments at the bottom of the page source tell you?

— [Eric Hameleers](#) 2012/09/03 15:51

Eric: you are absolutely right - I'll correct both your points ASAP.

- N.

Corrected!

- N.

Can we add `ssh-copy-id` as a command to copy the public key? It seems easier to use than `scp` for me, and probably less potentially destructive.

[Ellendhel](#) (French translator for this page)

Ellendhel: very good idea. I'll add `ssh-copy-id` soon.

- N.

Noryungi, I just used your excellent tutorial here to set up my pub/private keys on my three Slackware systems on my home network! Works very well. Thanks! :) — [V. T. Eric Layton](#) 2013/03/16 21:11

By the way, for this to work, the comment `#` needs to be removed from this entry in `sshd_config`. I will edit for you now. :)

```
nr@test.example.com$ grep -i pubkeyauth /etc/ssh/sshd_config
```

```
#PubkeyAuthentication yes
```

— [V. T. Eric Layton](#) 2013/03/18 19:31

Eric Layton, it should not be necessary to uncomment that line, because the commented-out values are the *defaults* in `sshd_config`. My own server still has that line commented-out and it works perfectly.

— [Eric Hameleers](#) 2013/03/19 02:03

That's odd, Eric. On my own Slack, I had to uncomment for this to work. *shrugging* I'll trust your judgment in this over my own and correct my edit. :) — [V. T. Eric Layton](#) 2013/03/19 11:02

The admonition: “WARNING: do not execute the scp command above if you already have an authorized_keys file on the remote computer! ...” amazingly leads to nested admonitions once converted to AsciiDoc ;) Isn't the capitalized word “WARNING” somehow redundant?.

Not important though, just a very small heads-up.

— [Didier Spaier](#) 2015/04/13 19:10

Better? — [V. T. Eric Layton](#) 2015/04/20 15:02

Yes, IMO at least, thanks Eric — [Didier Spaier](#) 2015/04/21 11:52

You're welcome! Keep an eye out for style/grammar/spelling errors, please. We like the wiki to be as accurate and correct as we can manage. :) [V. T. Eric Layton](#) 2015/04/28 17:27 EDT
