There seem to be problems with cpan2tgz at the moment. The dependencies seem to have changed and I had to install some of them as described in http://www.perlmonks.org/?node_id=128077 Still I managed to make it work. I am working to improve this wiki. Chris Abela 20/05/2013

Thanks to Jason Woodward <woodwardj at jaos dot org> who responded to my email for help by releasing cpan2tgz V.0.6.7, this wiki is now stable again. Chris Abela 24/05/2013

Crypt-Blowfish does not compile anymore with the latest perl on Slackware-current. I wrote to upstream maintainers but I had no response. You will need to install manually after de-bugging the source code. It should not be difficult, just remove the offending lines. Chris Abela 12/07/2013
