I suggest to make of this:

```
 * Note that when running 'slackpkg clean-system' slackpkg will assume that
your studioware packages are part of the default/stock set and will not list
them. To get around this turn slackpkg+ off in
/etc/slackpkg/slackpkgplus.conf or via CLI, then run slackpkg update,
slackpkg clean-system. Then you must turn it back on and run slackpkg update
once more to get back up-to-date. This alias may help:

alias clean='SLACKPKGPLUS=off slackpkg update; slackpkg clean-system;
SLACKPKGPLUS=on; slackpkg update'
```

a real note like that

```
<note>
When running 'slackpkg clean-system' slackpkg will assume that your
studioware packages are part of the default/stock set and will not list
them. To get around this turn slackpkg+ off in
/etc/slackpkg/slackpkgplus.conf or via CLI, then run slackpkg update,
slackpkg clean-system. Then you must turn it back on and run slackpkg update
once more to get back up-to-date. This alias may help:

alias clean='SLACKPKGPLUS=off slackpkg update; slackpkg clean-system;
SLACKPKGPLUS=on; slackpkg update'
</note>
```

Also, even though the page be in the studioware name space it wouldn't be bad to remind that to the readers, changing the title from

```
====== Instructions for setting up slackpkg+ and sbopkg ======
```

to

```
====== Studioware: Instructions for setting up slackpkg+ and sbopkg ======
```

This suggestion holds for all pages in the same namespace.
